Sunil Kumar

Senior Digital Engineer | Agentic AI, Generative AI & Microsoft Cloud

Phone: 8427165985 | Email: 14bbt1019@gmail.com | GitHub: https://github.com/Sunil-kumar01

PROFESSIONAL SUMMARY

Digital engineer with 8+ years across Microsoft cloud services, data science, and computer vision. Builds Python AI prototypes using LLMs, document extraction, RAG, and vector search; experienced in API/network troubleshooting and partner technical delivery.

CORE SKILLS

AI application engineering: Python, Flask, Streamlit, REST APIs, JSON, document processing	**Generative AI & retrieval:** LLM prompting, RAG, LangChain, ChromaDB, Gemini, Ollama, Qwen 2.5
Cloud & technical delivery: Azure Cognitive Services, Azure OpenAI, Marketplace, API debugging, Postman, networking, VNet, incident management	**Data science & ML:** pandas, NumPy, scikit-learn, EDA, classification, clustering, time-series forecasting
Data & reporting: SQLite, SQL, Power BI, Tableau, Excel, data quality	

PROFESSIONAL EXPERIENCE

Microsoft Marketplace Partner Support | Sonata Software — March 2026–Present

- Support Microsoft Marketplace partners with offer setup, submission, validation, and publishing questions.
- Reproduce and triage partner issues, gather diagnostics, explain next steps, and coordinate complex cases with internal teams.
- Track cases through resolution and document recurring issues and troubleshooting guidance.

Senior Microsoft Support Engineer — Azure Cognitive Services | Sonata Software — December 2023–2025

- Troubleshot customer and partner integrations across Azure Cognitive Services, including Speech, Language, Vision, Decision, and Azure OpenAI scenarios.
- Investigated APIs, configuration, dependencies, networking, and VNet connectivity; drove incident and case resolution.
- Created troubleshooting guidance; earned 8 monthly/quarterly awards, maintained a 4.97+/5 customer rating, and advanced to Tier 2.

Data Scientist | Neostats Analytics Pvt. Ltd. — April 2023–July 2023

- Analyzed Mashreq Bank personal-loan journey data with SQL and Power BI to find funnel drop-offs, data issues, and conversion patterns.
- Developed and evaluated logistic- and linear-regression prototypes for conversion likelihood and customer segmentation.

Accenture Solutions Pvt. Ltd. — July 2017–December 2022

Data Labeling / Computer Vision Associate (July 2017–December 2019); Trust & Safety Associate / Data Science projects (December 2019–December 2022)

- Contributed to a self-driving vehicle computer-vision program through LiDAR/image annotation, data quality audits, human evaluation, and team training.
- Supported trust-and-safety analytics and ML workflows: data preparation, EDA, feature selection, classification, clustering, and model evaluation.
- Contributed to commodity-hedging analysis using ARIMA-family models, Prophet, XGBoost, and Random Forest; shared findings through Power BI.

PERSONAL AI PROJECTS

Agentic AI POC — Vendor Invoice Compliance & Discrepancy Auditor
Built a Python/Streamlit prototype that extracts invoice PDF text with pypdf, calls local Qwen 2.5 via Ollama, and returns structured invoice fields with missing or unclear values for human review; it does not autonomously approve invoices. **Stack:** Python, Streamlit, pypdf, REST/JSON, Ollama, Qwen 2.5. Public GitHub project.

AI-Powered Document Search POC
Built Flask document Q&A for PDF, Word, and PowerPoint uploads, using LangChain and ChromaDB retrieval with Gemini answer generation; includes user/admin document-management flows. **Stack:** Python, Flask, LangChain, ChromaDB, SQLite, Google Gemini. GitHub repository (private).

EDUCATION & PROFESSIONAL DEVELOPMENT

- B.Sc. Biotechnology, Chandigarh University — 2017 (75%)
- Additional training: Data Science (Simplilearn, AlmaBetter); Generative AI (Coursera); MLOps (AWS/Vertex AI); Data Science Basics (Programming Hub).
